

Farm Beginnings® is an educational training and support program designed to help people who want to evaluate and plan their farm enterprise. Farm Beginnings® participants engage in a mentorship experience and network with a variety of successful, innovative farmers; attend practical, high quality seminars, field days and conferences.

One participant said,

"It has had a tremendous impact on our operation and we have developed a holistic goal for our farm/life and are excited about where we are headed."

A member of the class that is starting a new venture said,

"This program helped me organize my activities and efforts, helping me to understand what the important tasks were."

Another member of the class said,

"This program had a huge impact. I have improved my business plan, my overall efficiency and continue to try new ideas I thought to not be possible."

And finally,

"I found it to be an excellent way for someone such as myself, with no farm background, to understand the planning, scheduling, budgeting and marketing aspects of farming. . . . For anyone who has a desire to improve the quality of their lives while at the same time improving the quality of the land around them, I would strongly encourage them to take the Farm Beginnings® class. They will be glad they did."

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska-Lincoln cooperating with the Counties and the United States Department of Agriculture.

University of Nebraska-Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska-Lincoln and the United States Department of Agriculture.
